

VIRUS PRAYER:

1. Command it's genetics to be changed and eliminated.
 2. Command it to die.
 3. Command the white blood cells to attack it.
 4. Command infirmity to come out.
-

There is something within fear that has the ability to integrate units of memory, and we would call that a virus. It does the same thing in us that it does in the computer system. It prohibits bringing memory back the way it is suppose to be. Within you, a virus interferes with biological processes. The medical community calls a virus "an alien life force". It is an alien life force because it takes on the components of life, biologically, from an amino acid base. It is genetically aberrated in a way that is not common to the way it is created. A virus duplicates itself after the genetics that a human does in cell replication, DNA and RNA. A virus has genetic life and replicates itself according to a genetic code, but that genetic code is not normal to creation. It is an aberration of creation that produces disease in your life. Bacteria can be destroyed with antibiotics, but a virus cannot be destroyed by any medicine known to man. Viruses can be diverted, interfered with, redirected, blocked or expelled, but not destroyed. The white cells attack them and expel them as a waste by-product. They are an alien life force.
